RE: Release 2.14 of the Participant Termination Calculation System (PTCS)

Download from www.datair.com. You must have 2.11 or greater installed for the download to work.

There is no charge for this update if you have PTCS release 2.10. If you have an older version the update is \$695. To purchase PTCS new is \$995. If you install without updating you can view it as a demo. Call your sales representative for more information.

The main enhancement is listed below, but can also be seen in the system by pressing Alt-F1.

1. 2010-13 Plan Year distribution calculations will use the 10E00-13E00 mortality tables.

** NOTE ** PTCS uses the Plan Year Beginning on plan level screen 10 to determine which mortality table to use.

As always, we would like your suggestions for features needed in the system. If you have any questions, please give us a call.

DATAIR Licensing Wizard Instructions

The DATAIR License Wizard is designed to allow you to install license files without the need of a diskette. It can also create license diskette by downloading current license information over the internet.

Instructions:

1. Go to *Start | Programs | DATAIR Utilities* and launch *DATAIR License Wizard*.

Note: *If the License Wizard is not on your menu, go to www.datair.com, select Software Updates, and scroll to the Tech Updates section of the page and download and install LicenseWizard.exe.*

2. Enter the **Site ID** and **License Key** (below) in the fields provided.

Company Name [CompanyName]

Site ID **[CompanyAcctgID]**

License Key **[CompanyLicenseKey]**

Issue Date [CompanyLicenseDate]

3. Press **[Get License]**

Assuming the information entered is correct, the system will connect to our license server over the internet, verify the information provided, and download the license files to your computer, search for installed DATAIR systems on your computer, and install the license files where they need to reside.

Optionally, you may select the "Create Floppy" option to have the License Wizard create a diskette for your use.

Important!

The information contained in this notice is proprietary and confidential and is covered by your license agreement with DATAIR. It should be kept in a secure location. Use of the license key to retrieve license information is monitored electronically.

If you believe that unauthorized persons have had access to this information, please contact DATAIR immediately.

License Keys expire 6 to 12 months after issue. You will be notified when a new license key is issued for your site.

RE: Release 2.13 of the Participant Termination Calculation System (PTCS)

Download from www.datair.com. You must have 2.11 or greater installed for the download to work.

There is no charge for this update if you have PTCS release 2.10. If you have an older version the update is \$695. To purchase PTCS new is \$995. If you install without updating you can view it as a demo. Call your sales representative for more information.

The main enhancements are listed below, but they can also be seen in the system by pressing Alt-F1.

1. Added PPA mortality tables for 2009-2013.
2. 2009 Plan Year distribution calculations will use the 09E00 mortality table
3. Transfer from DB/DOS will now pick up mortality tables other than the default.

As always, we would like your suggestions for features needed in the system. If you have any questions, please give us a call.

RE: Release 2.12 of the Participant Termination Calculation System (PTCS)

Download from www.datair.com. You must have 2.11 installed for the download to work.

There is no charge for this update if you have PTCS release 2.10. If you have an older version the update is \$695. To purchase PTCS new is \$995. If you install without updating you can view it as a demo. Call your sales representative for more information.

The main enhancements are listed below, but they can also be seen in the system by pressing Alt-F1.

1. Segment rates for PPA 2006 have been added to Screen 12 of PTCS. If the plan year is 2008 or later and the segment rates are entered, the segment rates will be used.
2. If the segment rate fields are left blank, Pre-2008 417(e) calculations will be performed. This allows calculation of PVABs for PBGC terminations.
3. If the Plan Year on Screen 10 is a 2007 year and the segment rates are entered, an overflow error will result. .

As always, we would like your suggestions for features needed in the system. If you have any questions, please give us a call.
